Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Fair Reflection of Society in Judicial Systems - A Comparative Study Sophie Turenne, 2015-07-20 This book addresses one central question: if justice is to be done in the name of the community, how far do the decision-makers need to reflect the community, either in their profile or in the opinions they espouse? Each contributor provides an answer on the basis of a careful analysis of the rules, assumptions and practices relating to their own national judicial system and legal culture. Written by national experts, the essays illustrate a variety of institutional designs towards a better reflection of the community. The involvement of lay people is often most visible in judicial appointments at senior court level, with political representatives sometimes appointing judges. They consider the lay involvement in the judicial system more widely, from the role of juries to the role of specialist lay judges and lay assessors in lower courts and tribunals. This lay input into judicial appointments is explored in light of the principle of judicial independence. The contributors also critically discuss the extent to which judicial action is legitimised by any 'democratic pedigree' of the judges or their decisions. The book thus offers a range of perspectives, all shaped by distinctive constitutional and legal cultures, on the thorny relationship between the principle of judicial independence and the idea of democratic accountability of the judiciary.

**The Pixelated Prisoner** Carolyn McKay, 2018-06-13 Technological linkages between justice and law enforcement agencies are radically altering criminal process and access to justice for prisoners. Video links, integral to an increasingly networked justice matrix, enable the custodial appearance of prisoners in remote courts and are becoming the dominant form of court appearance for incarcerated defendants. This book argues that the incorporation of such technologies into

prisons is not without consequence: technologies make a critical difference to prisoners' experiences of criminal justice. By focusing on the prison endpoint and engaging with the population most affected by video links – the prisoners themselves – this book interrogates the legal and conceptual shifts brought about by the technology's displacement of physical court appearance. The central argument is that custodial appearance has created a heightened zone of demarcation between prisoners and courtroom participants. This demarcation is explored through the transformed spatial, corporeal and visual relationships. The cumulative demarcations challenge procedural justice and profoundly recompose prisoners' legal experiences in ways not necessarily recognised by policy-makers.

**Willful Ignorance** Helen T. Boursier, 2022-04-27 Using ethnographic research, *Willful Ignorance: Overcoming the Limitations of (Christian) Love for Refugees Seeking Asylum* examines the attitudes of clergy and lay leaders regarding their (in)attention to racism as it intersects with the harsh reality of U.S. immigration policies and practices. This multi-faceted work begins with a reality check on the scope of forced migration and its intersection with the historical legacy of racism in America, including testimonies from displaced migrants and immigration advocates who help to alleviate state-inflicted suffering at the U.S.-Mexico border. Helen T. Boursier examines the rationales Christian leaders use to justify the local church's nominal response, including the discursive buffers and stall tactics they use to deflect their lack of preaching, teaching, leadership and/or ministry with displaced migrants who are their near neighbors. The Christian church's firm foundation to embody love as social justice provides a historical rebuttal, while case studies of congregations that offer displaced migrants compassionate hospitality model exemplary contemporary response. Closing with practical suggestions for how to begin building bridges with migrants, Boursier argues for a philosophy of religion that embraces resistance to racism and exclusion from asylum, through a missiology of compassion that exemplifies an ecclesiology of love.

**Zimbabwe's Trajectory** V. Masunungure, 2020-11-11 At Independence in 1980, Julius Nyerere called Zimbabwe 'the jewel of Africa', and cautioned its new leaders not to tarnish it. Tragically, they paid no heed to Africa's esteemed elder statesmen. Arguably – and only if one ignores the carnage of Gukurahundi – the first decade was a developmental one, with resources being used prudently to benefit the formerly disadvantaged majority population. However, the 1990s witnessed a transition from a developmental to a predatory leadership which saw Zimbabwe cross the millennial line in crisis, where it has remained ever since. While many African countries have moved forward over the last three decades, Zimbabwe has gone relentlessly backwards, save for the four-year interregnum of the tripartite coalition government, 2009-2013. Virtually all development indicators point in the wrong direction and the crisis of poverty, unemployment, and the erosion of health, education and other public goods continues unabated. The imperatives of political survival and power politics supersede those of sound economics and public welfare. Moreover, unless good politics are conjoined with a sound people-first policy, the country will continue sliding downhill. *Zimbabwe's Trajectory* tells the story of the country's post-independence dynamics

and its recent descent into becoming one of the three most unhappy countries in the world.

*The International Criminal Court and National Courts* Nidal Nabil Jurdi, 2016-03-03 This book analyzes the position of the ICC in relation to national court systems. The research illustrates that what seemed to be a straight forward relationship between the ICC and national courts under the complementarity mechanism, proves to be much more complex in practice. Using the referrals of Uganda and Darfur, the book demonstrates ways in which it might be possible to prosecute for crimes currently not prosecuted by the ICC and brings to light possible solutions to overcome the gaps in law and practice in the jurisdictional relation between the ICC and national systems. It will be of value to academics, students and policy-makers working in the area of international law, international organizations, and human rights.

**Hypocrisy and Human Rights** Kate Cronin-Furman, 2022-11-15 Hypocrisy and Human Rights examines what human rights pressure does when it does not work. Repressive states with absolutely no intention of complying with their human rights obligations often change course dramatically in response to international pressure. They create toothless commissions, permit but then obstruct international observers' visits, and pass showpiece legislation while simultaneously bolstering their repressive capacity. Covering debates over transitional justice in Sri Lanka, Myanmar, Cambodia, Democratic Republic of the Congo, and other countries, Kate Cronin-Furman investigates the diverse ways in which repressive states respond to calls for justice from human rights advocates, UN officials, and Western governments who add their voices to the victims of mass atrocities to demand accountability. She argues that although international pressure cannot elicit compliance in the absence of domestic motivations to comply, the complexity of the international system means that there are multiple audiences for both human rights behavior and advocacy and that pressure can produce valuable results through indirect paths.

**Regulating Tobacco, Alcohol and Unhealthy Foods** Tania Voon, Andrew Mitchell, Jonathan Liberman, 2014-07-25 The need to reduce disability and premature deaths from non-communicable diseases (NCDs) is increasingly engaging international organisations and national and sub-national governments. In this book, experts from a range of backgrounds provide insights into the legal implications of regulating tobacco, alcohol and unhealthy foods, all of which are risk factors for NCDs. As individual countries and the international community move to increase targeting of these risk factors, affected industries are turning to national and international law to challenge the resulting regulations. This book explores how the effective regulation of tobacco, alcohol and unhealthy foods can be achieved within the context of international health law,

international trade and investment law, international human rights law, international intellectual property law, and domestic laws on constitutional and other matters. Its contributors consider the various tensions that arise in regulating NCD risk factors, as well as offering an original analysis of the relationship between evidence and health regulation. Covering a range of geographical areas, including the Americas, the European Union, Africa and Oceania, the book offers lessons for health and policy practitioners and scholars in navigating the complex legal fields in which the regulation of tobacco, alcohol and unhealthy foods takes place.

**The Triggering Procedure of the International Criminal Court** Héctor Olásolo, 2005-10-01 The Rome Statute, unlike the statutes of the International Criminal Tribunals for the former Yugoslavia and for Rwanda, creates a permanent court whose dormant jurisdiction covers the territory and includes the nationals of States Parties and is universal in cases where the Security Council makes a referral. Besides, unlike the ad hoc tribunals, which have jurisdiction over specific crisis situations whose personal, territorial and temporal parameters have been defined in their respective statutes by the UN Security Council, in the case of the ICC it is not possible to determine a priori in which situations the ICC will be involved. As a result, the most relevant activity of the Court is the determination of those situations regarding which the dormant jurisdiction of the Court will be triggered. The book *The Triggering Procedure of the International Criminal Court* constitutes the first comprehensive analysis of the proceedings that, prior to any criminal investigation, aim to make such a fundamental determination.

**Corporate Crisis Recovery** Petter Gottschalk,

American Law Lawrence M. Friedman, Grant M. Hayden, 2016-11-21 This book provides an introduction to the American legal system for a broad readership. Its focus is on law in practice, on the role of the law in American society; and how the social context affects the living law of the United States. It covers the institutions of law creation and application, law in American government, American legal culture and the legal profession, American criminal and civil justice, and civil rights. Clearly written, the book has been widely used in both undergraduate and graduate courses as an introduction to the legal system; it will be useful, too, to a general audience interested in understanding how this vital social system works. This new edition follows the same basic structure as applied in the previous editions providing a thorough revision and reworking of the text. This edition reflects upon what has happened in the years since the second edition was published in 1998, and how these events and evolutions have shaped our fundamental comprehension of the workings of the American legal system today.

**Trust in the Law** Tom R. Tyler, Yuen J. Huo, 2002-10-10 Public opinion polls suggest that American's trust in the police and courts is declining. The same polls also reveal a disturbing racial divide, with minorities expressing greater levels of distrust than whites. Practices such as racial profiling, zero-tolerance and three-strikes laws, the use of excessive force, and

harsh punishments for minor drug crimes all contribute to perceptions of injustice. In *Trust in the Law*, psychologists Tom R. Tyler and Yuen J. Huo present a compelling argument that effective law enforcement requires the active engagement and participation of the communities it serves, and argue for a cooperative approach to law enforcement that appeals to people's sense of fair play, even if the outcomes are not always those with which they agree. Based on a wide-ranging survey of citizens who had recent contact with the police or courts in Oakland and Los Angeles, *Trust in the Law* examines the sources of people's favorable and unfavorable reactions to their encounters with legal authorities. Tyler and Huo address the issue from a variety of angles: the psychology of decision acceptance, the importance of individual personal experiences, and the role of ethnic group identification. They find that people react primarily to whether or not they are treated with dignity and respect, and the degree to which they feel they have been treated fairly helps to shape their acceptance of the legal process. Their findings show significantly less willingness on the part of minority group members who feel they have been treated unfairly to trust the motives to subsequent legal decisions of law enforcement authorities. Since most people in the study generalize from their personal experiences with individual police officers and judges, Tyler and Huo suggest that gaining maximum cooperation and consent of the public depends upon fair and transparent decision-making and treatment on the part of law enforcement officers. Tyler and Huo conclude that the best way to encourage compliance with the law is for legal authorities to implement programs that foster a sense of personal involvement and responsibility. For example, community policing programs, in which the local population is actively engaged in monitoring its own neighborhood, have been shown to be an effective tool in improving police-community relationships. Cooperation between legal authorities and community members is a much discussed but often elusive goal. *Trust in the Law* shows that legal authorities can behave in ways that encourage the voluntary acceptance of their directives, while also building trust and confidence in the overall legitimacy of the police and courts. **The Politics of Gender Justice at the International Criminal Court** Louise A. Chappell, 2016 This book examines the gender justice design features of the Rome Statute (the foundation of the International Criminal Court), and assessing the effectiveness of the statute's implementation in the first decade of the court's operation. Chappell argues that although the ICC has provided mixed outcomes for gender justice, there have also been a number of important breakthroughs, particularly in regards to support for female judges.

**The Responsibility to Protect and the International Criminal Court** Serena Sharma, 2015-12-22 This book provides an account of how the responsibility to protect (R2P) and the International Criminal Court (ICC) were applied in Kenya. In the aftermath of the disputed presidential election on 27 December 2007, Kenya descended into its worst crisis since independence. The 2007-08 post-election crisis in Kenya was among the first situations in which there was an appeal to both the responsibility to protect and a responsibility to prosecute. Despite efforts to ensure compatibility between R2P and the

ICC, the two were far from coherent in this case, as the measures designed to protect the population in Kenya undermined the efforts to prosecute perpetrators. This book will highlight how the African Union-sponsored mediation process effectively brought an end to eight weeks of bloodshed, while simultaneously entrenching those involved in orchestrating the violence. Having secured positions of power, politicians bearing responsibility for the violence set out to block prosecutions at both the domestic and international levels, eventually leading the cases against them to unravel. As this book will reveal, by utilising the machinery of the state as a shield against prosecution, the Government of Kenya reverted to an approach to sovereignty that both R2P and the ICC were specifically designed to counteract. This book will be of interest to students of the Responsibility to Protect, humanitarian intervention, African politics, war and conflict studies and IR/Security Studies in general.

*Improving Teaching through Observation and Feedback* Alyson L. Lavigne, Thomas L Good, 2015-02-11 In response to Race to the Top, schools nationwide are rapidly overhauling their teacher evaluation processes. Often forced to develop and implement these programs without adequate extra-institutional support or relevant experience, already-taxed administrators need accessible and practical resources. *Improving Teaching through Observation and Feedback* brings cutting-edge research and years of practical experience directly to those who need them. In five concise chapters, Thomas Good and Alyson Lavigne briefly outline the history of RttT and then move quickly and authoritatively to a discussion of best practices. This book is a perfect resource for administrators reworking their processes for new evaluation guidelines.

*Media Law in Kuwait* Matt J. Duffy, 2018-06-11 Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in Kuwait surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Kuwait will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative

media law.
