The Dictionary of the Book Sidney E. Berger, 2023-01-16 Named a Library Journal Best Reference of 2023 - From Library Journal's Starred Review: This ambitious and entertaining update solidifies Berger's volume as a must-have title for librarians, booksellers, collectors, and students of the book arts and book history. This new edition of *The Dictionary of the Book* adds more than 700 new entries and many new illustrations and brings the vocabulary and theory of bookselling and collecting into the modern commercial and academic world, which has been forced to adjust to a new reality. The definitive glossary of the book covers all the terms needed for a thorough understanding of how books are made, the materials they are made of, and how they are described in the bookselling, book collecting, and library worlds. Every key term—more than 2,000—that could be used in booksellers' catalogs, library records, and collectors' descriptions of their holdings is represented in this dictionary. This authoritative source covers all areas of book knowledge, including: The book as physical object Typeface terminology Paper terminology Printing Book collecting Cataloging Book design Bibliography as a discipline, bibliographies, and bibliographical description Physical Condition and how to describe it Calligraphy Language of manuscripts Writing implements Librarianship Legal issues Parts of a book Book condition terminology Pricing of books Buying and selling Auctions Items one will see an antiquarian book fairs Preservation and conservation issues, and the notion of restoration Key figures, presses / publishers, and libraries in the history of books Book collecting clubs and societies How to read and decipher new and old dealers' catalogs And much more The Dictionary also contains an extensive bibliography—more than 1,000 key readings in the book world and it gives current (and past) definitions of terms whose meaning has shifted over the centuries. More than 200 images accompany the entries, making the work even more valuable for understanding the terms described.

*SOCIAL WORK IN JUVENILE AND CRIMINAL JUSTICE SYSTEMS (4th Ed.)* David W. Springer, Albert R. Roberts, 2017-05-16 *Social Work in Juvenile and Criminal Justice Systems* sets the standard of care for mental health treatment and the delivery of social services to crime victims, juvenile and adult offenders, and their families. The chapters, all authored by experts in the field and all committed to the mission of social justice, are written with the clear understanding that we cannot study criminal justice in a vacuum. Therefore, a major focus of the book is on the renewed growing sense of the profession's obligation to social justice. Each chapter interconnects with the various components of juvenile and criminal justice. Another prominent aspect of the book is that it is strength-based. It views those involved in the criminal and juvenile justice systems as individuals rather than inmates or criminals, each with unique positive talents and abilities. The book is divided into four sections. The first section discusses forensic social work, including crime and delinquency theories, trends, and ethical issues. The second section prepares social workers for practice in correctional institutions and explores crisis intervention with victims of violence, reentry of adult offenders in society, and aging in prison. The third section covers assessment and intervention in child sexual abuse, mental health and substance abuse, interpersonal violence and prevention, child welfare and juvenile justice. The final section presents an overview on social work in the twenty-first century, which includes restorative justice and the justice system, new ways of delivering justice, domestic violence, neighborhood revitalization, race and ethnicity, and social work practice with LGBTQ offenders. This book will be the best single source on social work in criminal justice settings and will prove to be an invaluable resource for the many professionals who have responsibility for formulating and carrying out the mandates of the criminal justice system.

**Information Concepts** Gary Marchionini,2022-05-31 Information is essential to all human activity, and information in electronic form both amplifies and augments human information interactions. This lecture surveys some of the different classical meanings of information, focuses on the ways that electronic technologies are affecting how we think about these senses of information, and introduces an emerging sense of information that has implications for how we work, play, and interact with others. The evolutions of computers and electronic networks and people's uses and adaptations of these tools manifesting a dynamic space called cyberspace. Our traces of activity in cyberspace give rise to a new sense of information as instantaneous identity states that I term profection of self. Profections of self influence how others act toward us. Four classical senses of information are described as context for this new form of information. The four senses selected for inclusion here are the following: thought and memory, communication process, artifact, and energy. Human mental activity and state (thought and memory) have neurological, cognitive, and affective facets.The act of informing (communication process) is considered from the perspective of human intentionality and technical developments that have dramatically amplified human communication capabilities. Information artifacts comprise a common sense of information that gives rise to a variety of information industries. Energy is the most general sense of information and is considered from the point of view of physical, mental, and social state change. This sense includes information theory as a measurable reduction in uncertainty. This lecture emphasizes how electronic representations have blurred media boundaries and added computational behaviors that yield new forms of information interaction, which, in turn, are stored, aggregated, and mined to create profiles that represent our cyber identities.
