Art Workshops for Children Hervé Tullet, 2015-09-21 A guide to twelve children's art workshops by one of the world's most innovative facilitators and best-selling bookmakers. *Art Workshops for Children* is a guide for parents and teachers to organize and execute artistic workshops for children. 12 workshops are featured, each offering a list of materials needed, a step-by-step guide to facilitation, practical tips, illustrated examples, and photos of workshops in progress. The workshops are designed to spark children's imaginations, champion group bonding, and give visually pleasing results – with no artistic ability required. Tried and tested around the world by children of all ages. Perfect for organizing group events at home, in schools, at parties, at museums – anywhere!

Screening the Body Lisa Cartwright, 1995 Traces the fascinating history of scientific film during the late nineteenth and early twentieth centuries and shows that early experiments with cinema are important precedents of contemporary medical techniques such as ultrasound.

Exploring Working Memory Alan Baddeley, 2017-09-08 In the World Library of Psychologists series, international experts present themselves career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, and their major theoretical and practical contributions. Alan Baddeley has an international reputation as an eminent scholar and pioneer in the field of human memory, and is principally known for the theory of working memory, devised with Graham Hitch. This model continues to be valuable today in recognising the functions of short-term memory. This volume includes a specially written introduction by Alan Baddeley which gives an overview of the start of his career and his entry into the field of Psychology. Throughout the book he also provides introductions to the selection of works included and contextualises them in relation to changes in the field during this time. *Exploring Working*

Memory includes the author's most influential publications on topics including short-term memory, the distinctions between short and long-term memory, the theory of working memory, the phonological loop, the concept of the central executive, and the episodic buffer. This exceptional selection concludes with an article giving a broad overview of the author's current views on working memory and its relation to other theories in the field. Through his outstanding work Alan Baddeley has become known as a world-leading expert on human memory. *Exploring Working Memory* is a unique collection which will be of great interest to both students and researchers interested in human memory from psychology backgrounds.

The Foundations of Mind Jean Matter Mandler, 2004-05-06 In *The Foundations of Mind*, Jean Mandler presents a new theory of cognitive development in infancy, focusing on the processes through which perceptual information is transformed into concepts. Drawing on her extensive research, Mandler explores preverbal conceptualization and shows how it forms the basis for both thought and language. She also emphasizes the importance of distinguishing automatic perceptual processes from attentive conceptualization, and argues that these two kinds of learning follow different principles, so it is crucial to specify the processes required by a given task. Countering both strong nativist and empiricist views, Mandler provides a fresh and markedly different perspective on early cognitive development, painting a new picture of the abilities and accomplishments of infants and the development of the mind.

Schools and Schooling in the Digital Age Neil Selwyn, 2010-10-07 This book tackles the wider picture, addressing the social, cultural, economic, political and commercial aspects of schools and schooling in the digital age, offering to make sense of what happens, and what does not happen, when the digital and the educational come together in the guise of schools technology.

Media Education David Buckingham, 2013-06-26 This book examines recent changes in media education and in young people's lives, and provides an accessible set of principles on which the media curriculum should be based, with a clear rationale for pedagogic practice. David Buckingham is one of the leading international experts in the field - he has more than twenty years' experience in media education as a teacher and researcher. This book takes account of recent changes both in the media and in young people's lives, and provides an accessible and cogent set of principles on which the media curriculum should be based. Introduces the aims and methods of media education or 'media literacy'. Includes descriptions of teaching strategies and summaries of relevant research on classroom practice. Covers issues relating to contemporary social, political and technological developments.

JOAN MIRO, MAGNETIC FIELDS. Rosalind E. Krauss, Solomon R. Guggenheim Museum, 1972

Nonlinearity, Chaos, and Complexity Cristoforo Sergio Bertuglia, Franco Vaio, 2005 Covering a broad range of topics and adopting a detailed philosophical approach to the subject, this text provides a comprehensive survey of the modelling of chaotic dynamics and complexity in the natural and social sciences.

Sonia Delaunay Cara Manes,Fatinha Ramos,2017-08-22 Sonia Delaunay made enormous contributions to the development of abstraction in the early 1900s. *Sonia Delaunay: Art Is Life* introduces young audiences to her art as Sonia and her six-year-old Charles embark on a magical road trip in their car, modelled after Sonia's 1925 design for a Citroën convertible. Together they glide into a landscape made up of colours and shapes drawn from Sonia's early abstract compositions - almost as if they've entered one of her paintings. Along the road, they make pit stops at 'sites' that inspired some of Sonia's key paintings of this period (such as the dance hall depicted in her 1913 work *Bal Bulier* and the open air Portuguese market that was the subject of her 1915 painting *Marché au Minho*). Sonia and Charles also explore her gorgeous and colourful designs for fabrics and clothing. Through these encounters, Sonia helps her son understand her artistic process of abstracting from reality by asking Charles what shapes and colours he discerns within these subjects. Their journey ends back in the real world, and Charles realizes that his mother's thinking about art permeates every aspect of their life.
