The Scariff Martyrs Tomás Mac Conmara, 2021-09-14 ' This incredible book is very, very important'. Damien Dempsey In November 2008, Tomás Mac Conmara sat with a 105 five-year-old woman at a nursing home in Clare. While gently moving through her memories, he asked the east Clare native; 'Do you remember the time that four lads were killed on the Bridge of Killaloe?'. Almost immediately, the woman's countenance changed to deep outward sadness. Her recollection took him back to 17th November 1920, when news of the brutal death of four men, who became known as the Scariff Martyrs, was revealed to the local community. Late the previous night, on the bridge of Killaloe they were shot by British Forces, who claimed they had attempted to escape. Locals insisted they were murdered. A story remembered for 100 years is now fully told. This incident presents a remarkable confluence of dimensions. The young rebels committed to a cause. Their betrayal by a spy, their torture and evident refusal to betray comrades, the loneliness and liminal nature of their site of death on a bridge. The withholding of their dead bodies and their collective burial. All these dimensions bequeath a moment which carries an enduring quality that has reverberated across the generations and continues to strike a deep chord within the local landscape of memory in East Clare and beyond.

Bodyscapes® Allan I. Teger, 2012 Can there be more than one reality at a time, and can we experience them both? These were the questions that led photographer and former psychology professor Allan I. Teger to create this collection of black and white Bodyscapes(R). At first glance, Bodyscapes appear to be landscapes; a second look shows that they are in fact nude bodies with small toys and miniatures set on them. Spanning a 35-year period, this collection shows more than 110 black and white images photographed in a single exposure without any post processing or manipulation. The body becomes the setting for golfing, skiing, mountain climbing, surfing, and other sports. Other images feature landscapes ranging from rolling farmlands to beaches and outer space. They are fun, beautiful, and sensual, but always in good taste. This elegant portfolio of Teger's images is an ideal, reality-bending addition to any art photography library.

Just So Stories Annotated Rudyard Kipling, 2021-01-26 Just So Stories for Little Children is a 1902 collection of origin stories by the British author Rudyard Kipling. Considered a classic of children's literature, the book is among Kipling's best known works. Kipling began working on the book by telling the first three chapters as bedtime stories to his daughter Josephine. These had to be told just so (exactly in the words she was used to) or she would complain. The stories describe

how one animal or another acquired its most distinctive features, such as how the leopard got his spots. For the book, Kipling illustrated the stories himself.

Land Rover Series III Maurice Thurman, 2018-08-07 The Series III Land Rover further developed the successive refinements of the Series I, II and IIA models, yet remained true to its original design as a utility vehicle for farmers; one that could be repaired and maintained with the minimum of specialist tools. It rapidly built up a worldwide reputation for rugged capability, which led to it being adopted by police forces and armies worldwide. The book describes the step-by-step development of the Series III, so the potential buyer becomes aware of each model's individual strengths and weaknesses. Having chosen your preferred model, you are professionally guided through important aspects of the retail market, and given clear instructions on where and how to check for problems before you buy. You will also be equipped to test drive your potential purchase with competence. Running and maintenance costs are realistically appraised, and a comprehensive checklist is provided to aid you through the evaluation process. With over 100 colour photographs integrated into the concise and informative text, this book really is the expert in your pocket.

Realm of the Hare Micheál Lovett, 2021 While searching for her missing mother, Boudicca Moriarty finds a silver locket containing a tiny book, prompting her to leave her home and join a tribe of child warriors. First Overland Tim Slessor, 2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew

... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

Implants in Qualitatively Compromised Bone Georg Watzek, 2004 Bone quality is one of the most important factors in the successful osseointegration of dental implants. However, the concepts of bone quality and compromised bone have never been well defined in the field of implant dentistry. To provide a clear definition of these terms, the contributors to this volume have compiled data from almost two decades of experimental and case studies, resulting in a comprehensive review of the current knowledge regarding the placement of implants in compromised bone. The book also presents specific considerations for placing implants in different types of compromised bone, such as aged, underdeveloped, and irradiated bone. A useful work of reference for implant students, practicing implant clinicians, and implant-oriented researchers.
