Len Wein

The Sculptor Scott McCloud,2015-02-03 David Smith is giving his life for his art—literally. Thanks to a deal with Death, the young sculptor gets his childhood wish: to sculpt anything he can imagine with his bare hands. But now that he only has 200 days to live, deciding what to create is harder than he thought, and discovering the love of his life at the 11th hour isn't making it any easier! This is a story of desire taken to the edge of reason and beyond; of the frantic, clumsy dance steps of young love; and a gorgeous, street-level portrait of the world's greatest city. It's about the small, warm, human moments of everyday life...and the great surging forces that lie just under the surface. Scott McCloud wrote the book on how comics work; now he vaults into great fiction with a breathtaking, funny, and unforgettable new work.

The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Board on Higher Education and Workforce,Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine,2018-06-21 In the United States, broad study in an array of different disciplines —arts, humanities, science, mathematics, engineering— as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievements of the past

century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. *The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education* examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

The Comic Book Film Adaptation Liam Burke, 2015-03-31 In the summer of 2000 X-Men surpassed all box office expectations and ushered in an era of unprecedented production of comic book film adaptations. This trend, now in its second decade, has blossomed into Hollywood's leading genre. From superheroes to Spartan warriors, *The Comic Book Film Adaptation* offers the first dedicated study to examine how comic books moved from the fringes of popular culture to the center of mainstream film production. Through in-depth analysis, industry interviews, and audience research, this book charts the cause-and-effect of this influential trend. It considers the cultural traumas, business demands, and digital possibilities that Hollywood faced at the dawn of the twenty-first century. The industry managed to meet these challenges by exploiting comics and their existing audiences. However, studios were caught off-guard when these comic book fans, empowered by digital media, began to influence the success of these adaptations. Nonetheless, filmmakers soon developed strategies to take advantage of this intense fanbase, while codifying the trend into a more lucrative genre, the comic book movie, which appealed to an even wider audience. Central to this vibrant trend is a comic aesthetic in which filmmakers utilize digital filmmaking technologies to engage with the language and conventions of comics like never before. *The Comic Book Film Adaptation* explores this unique moment in which cinema is stimulated, challenged, and enriched by the once-dismissed medium of comics.

The Blazing World and Other Writings Margaret Cavendish,1994-03-31 Flamboyant, theatrical and ambitious, Margaret Cavendish was one of the seventeenth century's most striking figures: a woman who ventured into the male spheres of politics, science, philosophy and literature. The Blazing World is a highly original work: part Utopian fiction, part feminist text, it tells of a lady shipwrecked on the Blazing World where she is made Empress and uses her power to ensure that it is free of war, religious division and unfair sexual discrimination. This volume also includes The Contract, a romance in which love and law work harmoniously together, and Assaulted and Pursued Chastity, which explores the power and freedom a woman can achieve in the disguise of a man.

Sam Zabel and the Magic Pen Dylan Horrocks,2015-01-18 Acclaimed cartoonist Dylan Horrocks returns with a long-awaited new graphic novel, the first since his perennial classic, 1998's Hicksville. Cartoonist Sam Zabel hasn't drawn a comic in years. Stuck in a nightmare of creative block and despair, Sam spends his days writing superhero stories for a large American comics publisher and staring at a blank piece of paper, unable to draw a single line. Then one day he finds a mysterious old comic book set on Mars and is suddenly thrown headlong into a wild, fantastic journey through centuries of comics, stories, and imaginary worlds. Accompanied by a young webcomic creator named Alice and an enigmatic schoolgirl with rocket boots and a bag full of comics, Sam goes in search of the Magic Pen, encountering sex-crazed aliens, medieval monks, pirates, pixies and — of course — cartoonists. Funny, erotic, and thoughtful, Sam Zabel and the Magic Pen explores the pleasures, dangers, and moral consequences of fantasy.

Why Comics? Hillary Chute,2017-12-05 A New York Times Notable Book Filled with beautiful color art, dynamic storytelling, and insightful analysis, Hillary Chute reveals what makes one of the most critically acclaimed and popular art forms so unique and appealing, and how it got that way. "In her wonderful book, Hillary Chute suggests that we're in a blooming, expanding era of the art... Chute's often lovely, sensitive discussions of individual expression in independent comics seem so right and true." — New York Times Book Review Over the past century, fans have elevated comics from the back pages of newspapers into one of our most celebrated forms of culture, from Fun Home, the Tony Award-winning

musical based on Alison Bechdel's groundbreaking graphic memoir, to the dozens of superhero films that are annual blockbusters worldwide. What is the essence of comics' appeal? What does this art form do that others can't? Whether you've read every comic you can get your hands on or you're just starting your journey, *Why Comics?* has something for you. Author Hillary Chute chronicles comics culture, explaining underground comics (also known as "comix") and graphic novels, analyzing their evolution, and offering fascinating portraits of the creative men and women behind them. Chute reveals why these works—a blend of concise words and striking visuals—are an extraordinarily powerful form of expression that stimulates us intellectually and emotionally. Focusing on ten major themes—disaster, superheroes, sex, the suburbs, cities, punk, illness and disability, girls, war, and queerness—Chute explains how comics get their messages across more effectively than any other form. "Why Disaster?" explores how comics are uniquely suited to convey the scale and disorientation of calamity, from Art Spiegelman's representation of the Holocaust and 9/11 to Keiji Nakazawa's focus on Hiroshima. "Why the Suburbs?" examines how the work of Chris Ware and Charles Burns illustrates the quiet joys and struggles of suburban existence; and "Why Punk?" delves into how comics inspire and reflect the punk movement's DIY aesthetics—giving birth to a democratic medium increasingly embraced by some of today's most significant artists. Featuring full-color reproductions of more than one hundred essential pages and panels, including some famous but never-before-reprinted images from comics legends, *Why Comics?* is an indispensable guide that offers a deep understanding of this influential art form and its masters.
