Spaces and Identities in Border Regions Christian Wille, Rachel Reckinger, Sonja Kmec, Markus Hesse, 2015-11-30 Spatial and identity research operates with differentiations and relations. These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys conducted in Germany, France, Belgium and Luxembourg.

**Wild Urban Woodlands** Ingo Kowarik, Stefan Körner, 2005-12-05 This book provides a first overview of the phenomenon of post-industrial urban wilderness: urban landscapes once shaped by heavy industry that are being re-colonized naturally by forests. These new types of urban woodlands are often overlooked by ecologists, foresters and planners. Individual chapters consider urban woodlands from the perspectives of ecology, environmental sociology, forestry, nature conservation and landscape architecture.

**The International status of education about the Holocaust** Carrier, Peter, Fuchs, Eckhardt, Messinger, Torben, Georg Eckert Institute for International Textbook Research (Germany), 2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further

formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

**Debating German Cultural Identity Since 1989** Kathleen James-Chakraborty, Linda Shortt, 2011 Interdisciplinary views of the debates over and transformation of German cultural identity since unification. The events of 1989 and German unification were seismic historical moments. Although 1989 appeared to signify a healing of the war-torn history of the twentieth century, unification posed the question of German cultural identity afresh. Politicians, historians, writers, filmmakers, architects, and the wider public engaged in memory contests over such questions as the legitimacy of alternative biographies, West German hegemony, and the normalization of German history. This dynamic, contested, and still ongoing transformation of German cultural identity is the topic of this volume of new essays by scholars from the United Kingdom, Germany, the United States, and Ireland. It explores German cultural identity by way of a range of disciplines including history, film studies, architectural history, literary criticism, memory studies, and anthropology, avoiding a homogenized interpretation. Charting the complex and often contradictory processes of cultural identity formation, the volume reveals the varied responses that continue to accompany the project of unification. Contributors: Pertti Ahonen, Aleida Assmann, Elizabeth Boa, Peter Fritzsche, Anne Fuchs, Deniz Göktürk, Kathleen James-Chakraborty, Anja K. Johannsen, Jennifer A. Jordan, Jürgen Paul, Linda Shortt, Andrew J. Webber. Anne Fuchs is Professor of German Literature at the University of St. Andrews, Scotland. Kathleen James-Chakraborty is Professor of Art History at University College Dublin, Ireland. Linda Shortt is Lecturer in German at Bangor University, Wales.

Intelligence, Race, And Genetics Frank Miele, 2009-04-21 In a series of provocative conversations with Skeptic magazine's senior editor Frank Miele, renowned University of California-Berkeley psychologist Arthur R. Jensen details the evolution of his thoughts on the nature of intelligence, tracing an intellectual odyssey that leads from the programs of the Great Society to the Bell Curve Wars and beyond. Miele cross-examines Jensen's views on general intelligence (the g factor), racial differences in IQ, cultural bias in IQ tests, and whether differences in IQ are due primarily to heredity or to remediable factors such as poverty and discrimination. With characteristic frankness, Jensen also presents his view of the proper role of scientific facts in establishing public policy, such as Affirmative Action. "Jensenism," the assertion that heredity plays an undeniably greater role than environmental factors in racial (and other) IQ differences, has entered the dictionary and also made Jensen a bitterly controversial figure. Nevertheless, *Intelligence, Race, and Genetics* carefully underscores the dedicated lifetime of scrupulously scientific research that supports Jensen's conclusions.

**Communicative Language Teaching in Practice** Rosamond Mitchell, 1988 This book documents the efforts of Scottish comprehensive school teachers implementing a communicative approach in the early years of secondary schools.

**Using German Synonyms** Martin Durrell, 2000-05-29 This book, designed for students who have already developed a

basic competence in German, aims to broaden and improve their vocabulary by providing detailed information on groups of German words with related meanings. It is invaluable as a guide to finding the right word for the context. In order to enhance understanding of the structure of the German vocabulary, groups of synonyms are organised under German (rather than English) headwords. All entries are accompanied by an example of usage and English glosses and there are two indexes allowing users quickly to locate words in German or English. The book takes full account of register variation, indicating the degree of formal or informal use, and reflects regional usage especially in Austria and Switzerland. It is an essential reference for intermediate and advanced students as well as teachers and other professional linguists seeking access to the finer nuances of the German language.

Discussing a wide range of practical applications, it makes the emerging topics of digital health and explainable AI in health care and medicine accessible to a broad readership. The availability of explainable and interpretable models is a first step toward building a culture of transparency and accountability in health care. As such, this book provides information for scientists, researchers, students, industry professionals, public health agencies, and NGOs interested in the theory and practice of computational models of public and personalized health intelligence.

Don't Call Me Ishmael Michael Bauer, 2012-01-01 By the time ninth grade begins, Ishmael Leseur knows it won't be long before Barry Bagsley, the class bully, says, Ishmael? What kind of wussy-crap name is that? Ishmael's perfected the art of making himself virtually invisible. But all that changes when James Scobie joins the class. Unlike Ishmael, James has no sense of fear - he claims it was removed during an operation. Now nothing will stop James and Ishmael from taking on bullies, bugs and Moby Dick, in the toughest, weirdest, most embarrassingly awful - and the best - year of their lives.

Shattered Past Konrad H. Jarausch, Michael Geyer, 2009-03-24 Broken glass, twisted beams, piles of debris--these are the early memories of the children who grew up amidst the ruins of the Third Reich. More than five decades later, German youth inhabit manicured suburbs and stroll along prosperous pedestrian malls. *Shattered Past* is a bold reconsideration of the perplexing pattern of Germany's twentieth-century history. Konrad Jarausch and Michael Geyer explore the staggering gap between the country's role in the terrors of war and its subsequent success as a democracy. They argue that the collapse of Communism, national reunification, and the postmodern shift call for a new reading of the country's turbulent development, one that no longer suggests continuity but rupture and conflict. Comprising original essays, the book begins by reexamining the nationalist, socialist, and liberal master narratives that have dominated the presentation of German history but are now losing their hold. Treated next are major issues of recent debate that suggest how new kinds of German history might be written: annihilationist warfare, complicity with dictatorship, the taming of power, the impact of migration, the struggle over national identity, redefinitions of womanhood, and the development of consumption as well as popular culture. The concluding chapters reflect on the country's gradual transition from chaos to civility. This penetrating study will spark a fresh debate about the meaning of the German past during the last century. There is no single master narrative, no *Weltgeist*, to be discovered. But there is a fascinating story to be told in many different ways.
